LANGUAGES

PROJECTS

UNIVERSITY COURSE SCHEDULING WEB APPLICATION

NC State University / Apache, MySQL, PHP, JQuery/JS, Docker

- Created a web application for University Officials to schedule course offerings prior to each semester. Included Import/Export functionality and data persistence capable of multi-user real time editing. Involved weekly video conferences to department heads.

MEDICAL RECORD MANAGEMENT WEB APPLICATION

NC State University / HTML, CSS, MySQL, Java, AngularJS

- Implemented new functionality for a web application that manages medical information for multiple users such as patients, healthcare providers, or doctors. This also included maintaining the existing web application through bug reports and customer feedback.

GAME ENGINE DESIGN/IMPLEMENTATION

NC State University / Java, Javascript

- Designed and Implemented Game Engine with scripting that was able to accommodate multiple games without any specific modifications to the engine itself. This required immense amounts of planning and design across several months with weekly simulated customer feedback.

MY PERSONAL WEBSITE

EthanApple.com / HTML, CSS, Javascript, C#, Azure

- This is a simple website designed to show off my portfolio as I grow my career. The site is hosted through Azure Cloud Services and was developed in Visual Studio with C#. As my career grows, new pages will be created to show off knowledge of complex functionality.
